

*We are
celebrating
20 years of
Sisters of Earth
creativity,
wisdom,
and action
And we invite
you
to help us
continue
unfolding ...*

At our 20th anniversary conference we wish to take stock of who we are becoming individually and collectively, and how we are participating in our own evolution. Instead of choosing presenters, we wish to extend an invitation to you, members of the Sisters of Earth, to share the wisdom of your experience of this evolutionary moment.

*How would you help us as a conference to live into our theme:
The New Emerging Humanity: Healing into Wholeness?*

We invite you to send us a paragraph or two describing how you would use 20 minutes to stimulate our thinking, engage our hearts, and live into a new humanity. The Program Committee will choose from the submissions and organize the presentations and processes into the kind of stimulating conference that can energize our conscious evolution.

Below are some reflections that might excite your thinking:

1. We are feeling into a new template for humanity and are looking into what is possible for us as an emergent species in an unfolding universe. What is our growing edge? What is trying to emerge? What is preventing our emergence? Where are the levels of novel interactions attracting people?
2. We have seen the Deep Time past yet need to place ourselves at the Shift Point to see the Deep Time future. What are some initiatives and undertakings that are happening at the Shift Point? What do you think the Shift Point is? How are you engaged in the Shift Point?
3. We are an emerging, self-evolving species offering our unique gifts towards the conscious evolution of humanity. As individuals and an organization, what do we have offer? Are there unique perspectives, resources, skills that we bring that we may not be using to the fullest?
4. We know that in the process of humanity emerging there are Evolutionary Crises, we also know that Crises precede Transformation. What is breaking down and what is breaking through in the Church, World, Self...?
5. Your position in the evolving social body is not merely given to you, it is emergent through and with you from your willingness to express the innate creativity, genius and patterning given to you by the process itself. The larger pattern is the shift in the planetary body now calling you to express yourself in new and dynamic ways. How can we participate in our evolution by letting go of the past, the ego, and come together in new collectives? Where is the "new" showing up for you?

Descriptions of presentations or processes are due January 20, 2014. Please send them to both tnashcsj@juno.com and sergail@together.net We look forward to hearing from you!
